

Net Stable Funding ratio (NSFR)

RBI vide its draft circular dated May 28, 2015 has prescribed norms for introduction of Net Stable Funding Ratio (NSFR). The final guidelines on "Net Stable Funding Ratio (NSFR)" under the Basel III Framework on Liquidity Standards was issued by RBI on May 17, 2018. However, due to the Covid-19 outbreak, RBI on various dates has extended the implementation of NSFR guidelines. As per RBI circular on 05.02.2021, the NSFR guidelines have been implemented from 01.10.2021.

LCR & NSFR for funding liquidity were prescribed by the Basel Committee for achieving two separate but complementary objectives. While LCR promotes short-term resilience of Banks to potential liquidity disruptions by ensuring that they have sufficient HQLAs to survive an acute stress scenario lasting for 30 days, the NSFR promotes resilience over a longer-term time horizon by requiring Banks to fund their activities with more stable sources of funding on an ongoing basis.

The NSFR is defined as the amount of Available Stable Funding (ASF) relative to the amount of Required Stable Funding (RSF). The Bank is maintaining NSFR of above 100%, which is the minimum requirement prescribed by RBI.

$$\text{Net Stable Funding Ratio} = \frac{\text{Available Stable funding (ASF)}}{\text{Required stable funding (RSF)}} \geq 100\%$$
